BOBER'S • 1947 • FAIR PRICE CATALOG

*of HARDIEST and BEST YIELDING
ALFALFA, PASTURE GRASSES,
FIELD and GARDEN SEEDS
RAPID CITY, SOUTH DAKOTA*

"—next after his Creator"

Our son, Louis, born and raised in western South Dakota, is now helping manage this business.

Our younger son Jack is just returning to civilian life and will be with us part of the time, when not in school.

"He who can double his food—deserves to rank—next after his Creator." Thomas Jefferson wrote those words about 150 years ago—but they were never more true than today.

Today, the world's greatest need is for food. People are starving—dying. The man who produces more food saves lives.

One of the best ways to help increase production is to use our new Improved Seed Grain, Forage Plants, Hardier and Disease Resistant ALFALFA and better and more productive PASTURE and HAY mixtures as well as many of the new and better introductions in Field Crops listed in this catalog.

We are proud to have pioneered Bromegrass and Alfalfa Mixture as well as the All Season Pasture and Hay Mixture, so successful and so profitable for our many livestock farmer friends.

FARM BETTER TODAY and LIVE BETTER TOMORROW by using BOBER'S hardiest and highest yielding Field and Garden Seeds.

With best wishes to you and yours in 1947, we remain,

Sincerely yours,

Sam H. Bober & Sons

TERMS OF SALE AND SHIPMENT

Payment: Cash in full with order. Money order, bank draft or check on good bank. We ship promptly on receipt of your order. All items are priced f.o.b. Rapid City or Newell, S. D., except garden seeds, which are prepaid.

OUR NEW HOME

We are now located in Rapid City, S. D., where our enlarged facilities will enable us to serve you more efficiently than ever! Here we can ship over the C. & N. W., Milwaukee or Burlington Railways and on Buckingham, Wilson or R. & B. Truck Lines. We maintain our Newell branch.

PLEASE ORDER ALL FIELD SEED AT ONCE

Help us, yourself, and the railroads, by letting us fill your order in midwinter when transportation is not crowded and when help is easier to get.

YOUR COOPERATION WILL BE APPRECIATED

BUY EARLY AND SAVE MONEY!

Bober's Field Seeds were awarded twelve First Prizes at the 1946 South Dakota State Fair.

Ten Reasons Why You Should Plant PROF. HANSEN'S SIBERIAN COSSACK ALFALFA

1. It is the hardiest alfalfa known; 2. A better soil builder than other alfalfa; 3. More drought resistant; 4. Will make a big crop of hay in a dry season when others fail; 5. Has a double root system, both branched and deep; 6. Makes finer quality hay; 7. Will yield more hay per acre no matter what the weather conditions are; 8. Freezing does not kill young plants, neither does it kill or injure the growing hay; 9. Requires less seed per acre than other varieties; 10. Hogs do not kill it out for pastures, as they do other strains. **COSSACK**, the World's Finest Alfalfa. Means more hay and a longer lasting stand. Purity 99 per cent, 90 per cent or more live seed. Dollar for dollar your best alfalfa buy.

10 lbs. \$6.10; 30 lbs. \$18.00; 60 lbs. \$35.40; 100 lbs. \$58.50

Cossack Alfalfa—Second Cutting—Heaviest Yielding—Grows in Every State in the Union

LADAK ALFALFA IS WILT RESISTANT

Originated in the very high mountainous section of India. It has proved very hardy and drought resistant and it is also wilt resistant. The supply of this seed is very limited. 99.5 per cent purity, 90 per cent or more live seed.

10 lbs. \$6.80; 30 lbs. \$19.80; 60 lbs. \$39.00; 100 lbs. \$64.50

LADAK AND COSSACK ALFALFA MIXED

For sections of country where wilt disease bothers alfalfa we recommend this mixture composed of half Ladak and half Cossack alfalfa for resistance to disease and at the same time high yielding ability of hardy alfalfa. 99 per cent purity, 90 per cent or more live seed.

10 lbs. \$6.45; 30 lbs. \$18.85; 60 lbs. \$37.20; 100 lbs. \$61.50

GRIMM-TYPE ALFALFA SEED

Ninety-nine per cent purity, 90 per cent live seed.

10 lbs. \$6.00; 30 lbs. \$17.65; 60 lbs. \$34.80; 100 lbs. \$57.50

MONTANA HARDY AND DAKOTA NO. 12 ALFALFA SEED

Ninety-nine per cent purity, 90 per cent live seed.

60 lbs. \$34.20; 100 lbs. \$56.50

FARM BELT ALFALFA SEED

A mixture of the above varieties, not as bright or as plump seed.

Ninety-eight per cent purity, 85 per cent live seed.

60 lbs. \$31.40; 100 lbs. \$52.00

All our seed is free from noxious seed. The above prices include the cost of the bags and Free Inoculation with the seed if ordered on or before February 1st

IMPROVED ALL SEASON PERMANENT PASTURE AND HAY MIXTURE

All Season Permanent Pasture is well adapted to alternate grazing. One-half is being pastured while the other half is growing up again.

FIRST WE TOLD OUR CUSTOMERS — NOW THEY ARE TELLING US

... how much more palatable, more productive per acre and more profitable they find our year around pasture and hay meadow, the **ALL SEASON PERMANENT PASTURE AND HAY MIXTURE**. We know it is good and we know it is the best value and that is why we recommend it to you without qualification as a real investment. Here are a few facts:

1. Once established, it does not have to be reseeded.
2. It is good insurance against pasture shortage due to seeding failures or winterkilling of certain crops intended for use as pasture.
3. These sod-forming grasses mixed with alfalfa will build soil, prevent erosion, stop bloat, and make the stands last.
4. **ABUNDANT GREEN FORAGE** is produced from early spring to late fall —ideal for dairy cattle.
5. It provides pasture in cold weather when other grasses are dormant.
6. It has two or three times the carrying capacity of ordinary pastures and when cut for hay, it produces two to three times the tonnage of more palatable and nutritious hay per acre than do the ordinary grasses.
7. It can be plowed up anytime or left indefinitely.
8. It resists dry weather and will choke out weeds.
9. It is ready to receive livestock from two to four weeks before other grasses may safely be used. It is the pasture with the **High Protein Content**.
10. It starts sufficiently early to be ready in most years for use during the calving and lambing. It stimulates the flow of milk from cows and ewes which results in increased vigor and significantly higher weaning weights.

THIS PASTURE PUTS NITROGEN AND FIBER IN THE SOIL; MEAT ON YOUR LIVESTOCK AND MONEY IN YOUR POCKET

Pasture A. For fertile land with sufficient rainfall or on irrigated land. Composed of equal parts: Smooth Brome grass, Hardy Leafy Alfalfa, Slender Wheatgrass and Domestic Ryegrass. Plant 16 to 20 lbs. per acre.

50 lbs. \$16.00; 100 lbs. \$31.00

Pasture B. For semi-arid region and land of medium fertility. Composed of equal parts: Smooth Brome grass, Crested Wheatgrass, dwarf Sweet Clover, Domestic Ryegrass and Hardy Leafy Alfalfa. Plant 10 to 14 lbs. per acre.

50 lbs. \$14.75; 100 lbs. \$28.75

STEERS VOTE OUR PASTURE THE BEST

From a Benton County, Iowa, farmer: "Your All Season Pasture and Hay Mixture made more money per acre for me, with less work, than my corn did. It made possible the cheapening of beef cattle by 50 per cent, and I got six times as much feed as ever before on the same piece of ground."

Smooth BROME GRASS Outyields Bluegrass 2 to 1 Most Palatable of All Pasture Grasses

Smooth Brome Grass is a Giant Bluegrass—hardy and permanent and it roots deeply, sometimes 4 and 5 feet deep, making it stand dry and hot weather as well as the coldest winters.

It is the first green grass in the spring and the last in the fall and keeps green all summer when other grasses are dried.

All classes of livestock like it. Very palatable. As it is a grass, it cannot poison stock. It is important to seed it as early as the ground can be worked. Very little if any injury from frost.

Plant 15 to 20 pounds per acre, where it is seeded alone. Do not cover deeply— $\frac{1}{2}$ -inch deep is sufficient. No. 1 seed, free from foul weeds.

Smooth Brome Grass

10 lbs. \$3.15; 25 lbs. \$7.50; 50 lbs. \$14.50; 100 lbs. \$28.00

DOUBLE DUTY PASTURE

"Miracle Twins" BROME and ALFALFA Produce Profits and Save Soil

A Fifty-Fifty Mixture of Quality Seed

For years you've heard about "renovating" bluegrass—snapping it up with lime and legumes. Now experimenters are talking about a better system. It's called "conversion"—changing bluegrass over to more productive brome grass and alfalfa. Both are very drought resistant. They supplement each other in a remarkable way. Pasture test for an average of three years, an acre of Brome-Alfalfa produced 3,933 pounds of milk and had an average of 145 pasture days. Straight Alfalfa produced 3,606 pounds of milk and provided 124 pasture days. In another test the mixture pastured by sheep gained 362 pounds per acre. Straight Alfalfa 209 pounds. Sow about 16 pounds of the mixture per acre.

\$21.50 for 50 lbs.; \$42.50 per 100 lbs., including bags

Herefords on Brome-Alfalfa Pasture

**PASTURE is your cheapest and most
PROFITABLE FEED**

New **RANGER ALFALFA**

After years of patient research, plant breeders of the U. S. Department of Agriculture have developed a new **winter hardy Bacterial Wilt Resistant RANGER ALFALFA**, which will maintain good stands in wilt infested areas, for many years after Grimm and Common alfalfa have been killed by the disease. It will also yield 24 per cent to 30 per cent more hay per acre in such areas.

RANGER ALFALFA is the result of crossing and recrossing of Cossack, Ladak, Dakota No. 12, Hardistan and Russian Turkestan alfalfa. It will not yield more and will not do better than Cossack and Ladak alfalfa where bacterial wilt is not too much of a problem.

We have a limited amount of Ranger Alfalfa seed which will be distributed to alfalfa seed growers. For some of our customers who wish to plant a small trial plot we offer 1 lb. of Ranger alfalfa for \$1.40; 5 lbs. for \$6.50 prepaid.

GROW QUICK PASTURE MIXTURE **3.75** **25 Lbs.**

For Cattle, Sheep and Hogs

The cost of seeding is low and it gives quick production of **Palatable Pasture** within relatively few weeks after sowing.

Contains equal parts of Sweet Clover, Domestic Ryegrass, Timothy, Rosen Rye or Oats.

The Ryegrass and Rosen Rye in this combination are fast growers and afford the earliest feed. Meanwhile the Sweet Clover and Timothy are developing to increase its production and value. It keeps on growing until after frost. The Sweet Clover, Timothy and most of the Ryegrass of course live over winter and can be used the next year for plowing under, for continued pasture or cut for hay.

Sow 20 pounds per acre. Sow about the time you sow small grain. Do not use a nurse crop.

50 lbs. \$6.75; 100 lbs. \$12.50, including bags

Lambs on Grow Quick pasture

Fall Rye: When planted at the rate of 1 bu. to 1½ bu. per acre, in early spring, makes good pasture until midsummer.

\$3.00 per bushel, including bag

CRESTED WHEATGRASS—The Miracle Grass Builds BEEF and MUTTON

A drought resistant, long lived perennial bunch grass, introduced by Professor Hansen of South Dakota State College, who found it in Siberia from where he also introduced Cossack Alfalfa. It is as perfect a balanced diet as can be found in one plant. Sometimes called the Miracle Grass because of its:

RESISTANCE TO SEVERE CLIMATIC CONDITIONS: Introduced from the plains of Siberia, it has stood the most severe droughts of the western plains and has withstood temperatures ranging from 50 degrees below zero to 120 degrees above during hot and dry summer months.

LONG GROWING SEASON: Becomes green two weeks earlier in the spring than other grasses and stays green later in the fall. Has grown four inches in November and December before below zero temperatures put it in a temporary dormant stage.

HEAVY PRODUCTIVITY: The Wyoming Experiment Station reports that its hay produces seven times as much meat per acre as is produced by native grass hay. Produces twice as much pasture and hay of high palatability as native grass. Tests as high as 35 per cent protein AND shows absolutely no effect from heavy grazing.

RECLAIMING VALUE: Because of its heavy root system and resistance to severe climate, it has reclaimed millions of acres of land apparently ruined by erosion. It reseeds itself and chokes out weeds, conserves moisture and at the same time provides a wonderful forage for livestock.

10 lbs. \$3.10; 25 lbs. \$7.25; 50 lbs. \$14.00; 100 lbs. \$27.50

Photo by the Black Hills Studio

Wheatgrass is not only the most profitable for beef cattle but is also the best year round permanent pasture for production of wool and mutton on dry upland in west and southwest states

DRY LAND PERMANENT PASTURE MIXTURE

High altitude seed produced from the hardiest known strains, grown without irrigation. Well adapted to the intermountain region as well as lower country of the Western and Southwestern states. Composed of two parts Forage-type Crested Wheatgrass and one part of each Smooth Brome Grass, Domestic Rye-grass and Dwarf Yellow Sweet Clover.

25 lbs. \$6.30; 50 lbs. \$12.00; 100 lbs. \$23.50

SWEET CLOVER is the CHAMPION Soil Builder

HUBAM ANNUAL SWEET CLOVER increases yields. For quick grazing and soil improvement plant 12 pounds of Hubam Clover per acre with your oats, wheat or barley. It is very desirable for bees, too. You can plow it under in early fall or harvest a good seed crop.

\$15.75 per bushel; \$26.50 per 100 lbs.

BEST NORTHERN WHITE SWEET CLOVER SEED

10 lbs. \$2.10; 30 lbs. \$5.75; 60 lbs. \$11.00; 100 lbs. \$17.50

BEST NORTHERN YELLOW DWARF SWEET CLOVER

10 lbs. \$2.10; 30 lbs. \$5.75; 60 lbs. \$11.00; 100 lbs. \$18.00

DWARF ESSEX RAPE SEED FOR SHEEP AND PIG PASTURE

5 lbs. \$1.10; 10 lbs. \$2.00; 25 lbs. \$4.50; 50 lbs. \$9.35

NORTHERN GROWN TIMOTHY SEED

25 lbs. \$3.25; 50 lbs. \$6.00; 100 lbs. \$11.50

DOMESTIC RYEGRASS FOR EARLY PASTURE

10 lbs. \$1.80; 25 lbs. \$4.25; 50 lbs. \$8.00; 100 lbs. \$15.50

TO IMPROVE YOUR PASTURE AND SOIL

PLANT LADINO CLOVER

A leafy succulent perennial, a giant form of White Clover, has a tendency to remain close to the ground. It is a very useful legume addition to your present pasture on some of the soils which are not suitable for alfalfa. A pound of seed per acre in mixture with your other grasses will be a very good investment on your farm. A complete recovery after grazing takes place in two weeks. An able competitor with most grasses.

\$2.10 per lb., 5 lbs. for \$9.50; 10 lbs. for \$18.50 prepaid

FOR ALKALI SOILS

STRAWBERRY CLOVER—Thrives on alkali soils. A perennial low-growing plant makes an excellent pasture on alkali land that does not tolerate other plants. Used successfully in irrigation districts to make useless land profitable. Plant 2 pounds per acre. You will be well pleased with results.

\$2.15 pound; 5 lbs. prepaid for \$10.00; 10 lbs. \$19.00, postpaid

New MONTANA PERENNIAL CLOVER Thrives on Alkali Soils

This plant which looks like a cross between sweet clover and alfalfa was discovered growing in low moist alkali soil in Montana, is cut, cured and stacked like alfalfa. There are many farms in the west with alkali spots not capable of producing any kind of plant growth and this new perennial Clover will immediately make such worthless land profitable. Plant 5 to 7 pounds per acre late in February or in March. Shallow planting on firm ground is best.

1 lb. \$1.00; 5 lbs. \$4.50, prepaid. Not prepaid, 10 lbs. \$7.50; 25 lbs. \$17.50.

BIRD'S-FOOT TREFOIL for Moderately Alkaline Lands

A new perennial legume adapted for irrigated or sub-irrigated land or in sections of country where rainfall or irrigation is not sufficient enough to grow good Ladino Clover.

5 lbs. \$10.75; 10 lbs. \$21.00; 50 lbs. \$105.00, prepaid

Sam Bober Pioneered Brome-Alfalfa

50-50 Mixture of Quality Seed

Sam H. Bober, who was among the first to recognize the higher value of Legume-Grass mixtures and pioneered the Brome-Alfalfa fattening pastures. We operate a 10,000 acre ranch in Butte county, on the northern foothills of the Black Hills, for livestock grazing and for trying out new introductions in field crops.

Labor-short farmers who grew up on dry-lot feeding now speak enthusiastically about **FATTENING PASTURES** composed of Smooth Brome Grass and Hardy Dryland Alfalfa (50-50 mixture) **that can put cattle, hogs and sheep on the market**, with less grain, less protein and a whale of a lot less work. These farmers speak, too, of fattening pastures growing from our grass-legume mixtures **that add 10, 15, 20 or more bushels to the acre** when the land is put back to corn or grain after two or more years in meadow.

Sam H. Bober pioneered these grass-legume pastures just 30 years ago when he was in charge of pasture and livestock experimental work for the U. S. Experiment Station. Now over a dozen leading State Experiment Stations recommend it.

**\$21.50 for 50 lbs.; \$42.50 per 100 lbs.
including bags**

SAVE MONEY ON MINERALS

The **LADINO CLOVER** plant contains 25% protein, is high in fat and is a fine source of minerals because of its high ash content. On fertile soils we advise adding 1 pound of **LADINO CLOVER** seed per acre to whatever pasture you are now using.

Ladino Clover is a super-giant cousin of the little white clover. It restores nitrogen to the soil many times more rapidly than its miniature cousin. Wisconsin, Indiana, Illinois and Ohio stations recommend it. In Iowa it topped nine tests compared with other clovers.

1 lb. \$2.10; 5 lbs. \$9.50; 10 lbs. \$18.50

HAY for HENS and PASTURES for PULLETS

Besides being such a good addition to pastures for Cattle, Sheep and Hogs, **LADINO CLOVER** is now coming in prominently as most practical pasture for poultry. One of our Wisconsin customers writes us that he has saved 50% in mash when the pullets went on **LADINO** range and that this pasture carried more pullets per acre than he had ever attempted with other pasture mixtures.

1 lb. \$2.10; 5 lbs. \$9.50; 10 lbs. \$18.50

ORDER EARLY AND AVOID DELAYS AND DISAPPOINTMENTS

South Dakota Agri. Experiment Station Photo

RANCHER SORGHUM

The newest introduction in sorghums released by the South Dakota Experiment Station, will save stockmen thousands of dollars by preventing losses from acid poisoning and give us a dependable safe forage. RANCHER Sorghum is a hybrid developed by crossing and recrossing Low Acid selections from Dakota Black Amber.

It has a sweet leafy stalk plant with the lowest hydrocyanic acid content of any named forage sorghum variety in production; it contains only one-third the acid of the Low Acid Cane and only one-tenth of the dangerous acid content of commercial varieties of cane. It looks to us as if this will make Rancher Sorghum as safe to pasture as Bluegrass.

It has produced six and one-half tons of forage and 2,260 pounds of grain per acre, 25 per cent more than the Amber Cane alongside it.

10 lbs. \$1.65; 25 lbs. \$3.60; 50 lbs. \$6.60; 100 lbs. \$12.50

LOW-ACID CANE

A South Dakota State College introduction which yields more than ordinary cane and has only one-fourth the acid of other commercial varieties. Experiment Stations show that this sorghum produces more forage and feed units per acre regardless of moisture supply. Used for silage in mixture with corn or by itself by many farmers east and west.

10 lbs. \$1.30; 50 lbs. \$5.50; 100 lbs. \$10.00

OATS with an OVERCOAT

for Western and Southwest farms

Brunker Oats No. 2054 are frost resistant. They can be planted in late February or early in March and are not materially injured by spring freezing. When other varieties of oats were killed by late April heavy freeze last year, Brunker oats came through uninjured and made record yields of grain per acre. They are also smut and rust resistant. Order without delay. You will get real value for your money. Earliness Cheats Hazards of July.

10 bu. for \$13.00; 20 bu. or more at \$1.25 bu.

NEW SWEET SUDAN

Free choice of milk cows on Lubbock Experiment Station pasture, shows Sweet Sudan pastured off to the ground before the common Sudan planted alongside the Sweet is touched.

THE IMPROVED SUMMER PASTURE

Sweet Sudan Grass has the grassy character of Common Sudan plus juicy sweetness that livestock wants. Sweet Sudan grows taller than Common Sudan, has more and wider leaves, non-shattering seed head, and is resistant to drought and disease.

25 lbs. \$4.75; 50 lbs. \$8.50; 100 lbs. \$16.50

COMMON SUDAN GRASS

The perfect summer pasture and annual hay plant, whether you live in Eastern States, North, South or in the West. Grows rapidly and thrives in the hot dry months when other pastures are least productive. This is more resistant to grasshoppers than the Sweet Sudan.

Sudan grass is planted at 4 to 20 pounds per acre depending on rainfall.

Standard SUDAN GRASS seed, No. 1 grade.

25 lbs. \$3.75; 50 lbs. \$7.25; 100 lbs. \$13.75

SAVE LABOR — LET HOGS, SHEEP AND CATTLE HARVEST THE CROP

Whether you live East, West, North or South, try this on Sam's recommendation. Plant **GEHU 70-day Flint**, or **Falconer Semi-dent 75-day corn**. High yielding ability and highest fattening quality, best adapted for hogging and sheeping off. Save work and make a higher profit on your livestock. The **earliest maturing corn in the United States**, with real high fattening value. Puts your finished livestock on an earlier market.

Gehu Flint, \$6.25 per bu.; Falconer, \$5.65 per bu.

BOBER'S SEED CORN

For BIGGER YIELDS on Western Lands

Gehu Flint—70-day corn—unexcelled for hogging and sheeping off, drought, frost and hail resistant. Its feeding qualities the highest of any corn.

\$6.25 per bu.

Falconer—75-day yellow semident—the best yielding of early maturing, open pollinated corn. Also used for hogging and sheeping off.

\$5.65 per bu.

Payne's White Dent—80-day corn—record yield of 91 bushels per acre, a consistent good yielder. Also used for hogging off.

Early Minnesota No. 13 Yellow Dent.

Squaw Flour Corn—80-85-day maturity.

Early Northwest Dent (red and white cap)—Leafy, 85-90-day corn.

Rainbow Flint—Highest yield for silage corn, for open pollinated corn.

Price for above 5 varieties of seed corn including bags:

1/2 bu. \$2.50; 1 bu. \$4.50; 5 bu. \$21.25

SO YOU DON'T BELIEVE IN MAGIC? TRY THE New K. F.! THE EARLIEST MATURING HYBRID

Recommended for the 80-day areas of the Dakotas, Montana, Wyoming, Michigan, Minnesota, New York, Utah, etc.

This new Kingscrost KF Hybrid represents 15 years of research to develop a superior corn to replace Falconer and flint varieties. Its rapid spring growth at low temperature, adaptation to short seasons and leafiness are from the flint parent. Non-suckering, tall plants, high ears, and stalk strength to insure fall standability, are contributed by the dent parents. **Easy to pick by hand and ideal for mechanical picking plus INCREASED YIELD** makes this the greatest achievement in several years.

1/2 bu. \$5.50; 1 bu. \$10.50; 5 bu. \$51.50

HYBRID CORN THAT YIELDS MORE

Extra Early Straight Yellow Dent Hybrids for 80-day and 85-day maturity.

1/2 bu. \$5.00; 1 bu. \$9.50; 5 bu. \$46.75

Now we can furnish you **FROST Resistant, DROUGHT, Heat and Wind Resistant** corn that proved to be record breaking producers of **MORE BUSHELS** of deep kernel, small cob corn per acre in the 80-day and 85-day maturity. Specify KE3 for the 80-day and KE2 for 85-day corn.

90-day Beautiful Yellow Dent Hybrid with tremendous eye appeal in the field, wagon box and crib. Large plants, high ears and a stalk that stands up; winner of the Silver Trophy for highest yield per acre. Just cob enough to hold the kernels together. **Survives cold springs and ripens before earliest frosts.** What better recommendation?

1/2 bu. \$5.00; 1 bu. \$9.50; 5 bu. \$46.75

DON'T GET CAUGHT SHORT

ORDER ALL SEED EARLY THIS YEAR

Hybrid Corn

**AMERICA'S HIGHEST YIELDING HYBRIDS OF EARLIEST
MATURITY GIVE YOU EXTRA VIGOR AND MOST
DROUGHT, PEST AND DISEASE RESISTANCE**

HYBRID CORN FOR 100 TO 110 DAY MATURITY AND RECORD YIELDER OF GOOD SILAGE CORN

For fertile land with good rainfall we recommend this Hybrid to produce bumper crops. It has large leafy plants, dependable earliness and deepkerneled soft starch ears. It is a little later maturing than our earliest maturing. Wonderful for silage, showing large per cent of grain in proportion to roughage. Fine for dairy cattle and fattening stock.

$\frac{1}{2}$ bu. \$4.50; 1 bu. \$8.50; 5 bu. \$41.75

WHEATLAND BLEND—Hybrid Seed Corn

Northern Grown for Northern Farmers

A practical blend of 80-day flint and 85 and 90-day yellow dents in the round, or as some refer to it, thick flat kernels. There is an advantage in having a variance of maturities where unfavorable weather conditions might hit the corn at a critical period of its growth. A planter plate recommendation tag will be sewed in each bag of Wheatland Hybrid seed corn.

Price \$6.00 per bushel

NEW MARTIN'S COMBINE MILO

Yields 40 to 100 bu. per acre

Because it yields more bushels than other Milo varieties in grain per acre, equal to corn in feeding value, and will produce a crop in drought years when grain crop is a failure, and because it is harvested readily by combine, this new introduction will be in strong demand as long as the labor shortage lasts. For Western and Southwestern states we advise—Plant the Limit of this Combine Milo for grain which the United States and the World needs. Only 6 to 8 pounds per acre.

10 lbs. \$1.00; 25 lbs. \$2.00; 50 lbs. \$3.75; 100 lbs. \$6.50; 500 lbs. \$31.50

BRUNKER OATS U. S. Plant Selection No. 2054

Made a Record of 139 Bu. Per Acre in 1946

Brunker Oats ripen ahead of hoppers, drought and July heat

A rapid growing, **earliest-maturing** and higher-yielding variety of oats for dryland and western states. This variety is drought resistant and carries considerable smut resistance. In variety tests it has **outyielded all other early varieties of oats**, especially on dryland in short season country. Awarded First Prize at South Dakota State Fair.

10 bu. for \$13.00; 20 bu. or more at \$1.25 per bu., including bags

SPARTAN BARLEY EVADES DROUGHT

Ripens Ahead of Hoppers, Drought and July Heat

The earliest maturing and one of the highest yielding varieties. It is a two row, **smooth bearded**, easier to handle and equals corn in **feeding value**, weighing 56 pounds per bushel. **IT ESCAPES** drought rather than resists it.

You can plant it early in March because it is cold resistant. Ripens before hot and dry winds in July injure other varieties. A customer writes, "This seed did not cost me anything. The extra yield above the barley I had been using more than paid for the seed."

The earliest, heaviest, and most beautiful barley. The judges at the **State Fair** awarded it **FIRST PRIZE**.

500 lbs. \$18.00; 1,000 lbs. or more \$3.55 per 100 lbs., including bags

TREAT that SEED GRAIN

It's a job that will pay upwards of 100% profit on the investment of time and money. For every 32 bushels of seed grain, order one pound of **New Improved Ceresan** to control smut, at 80 cents per pound can. Order Seed grain without delay, to be sure your order will be filled and to allow time for shipment.

1 lb. 80 cents; 4 lbs. \$2.70, plus postage

ORDER SEED GRAIN AT ONCE, to allow plenty of time for shipment by freight or truck and for early planting. Also order 1 pound of **Improved CERESAN** for every 32 bushels of seed grain to be planted on your farm.

1946 Record of 64 Bu. Mida Wheat Per Acre

NEW AND BETTER MIDA SPRING WHEAT

In 26 tests it has **OUTYIELDED** all other well known varieties. **STRONG IN STRAW—EARLY HEADING—Does NOT Shatter—Highest in Test Weight—Resistant to Rust and Stinking Smut—Resists Hessian fly damage.** Excellent Milling quality—High in Protein—Low in Ash. It is the answer to the spring wheat grower's dream. Record of **64 bu. per acre** here this year.

5 bu. for \$14.50; 10 bu. or more at \$2.85, including extra heavy seamless cotton bags

PILOT NO. 13 SPRING WHEAT

Harvest Is Good Despite Hoppers, Hail and Rust

A government plant breeder's selection from Pilot wheat, not only highly resistant to rust, but it seemed also to be **resistant to hail and grasshopper damage.** It outyields other spring varieties and is close to Mida wheat in yield. Has straw strength. Does not shatter. Has milling quality.

5 bu. for \$14.00; 10 bu. or more at \$2.75 per bu., including bags

VELVON

A New Smooth-Awned Barley

That **outyielded** all other kinds alongside of it in variety test. This new variety resulted as a **HYBRID** strain from a cross made by Dept. of Agriculture plant breeders, for the purpose of improving straw strength and smoothness of beard as well as higher yielding ability. If you have good land and want a real **HIGH YIELD**, order your seed **NOW**.

\$2.00 per bu., including bags

KINDRED or 'L' BARLEY

A New Rough-Awned Six-Row Variety

(1) Early Maturing; (2) Heavy Yielding; (3) Stem-rust Resistant, and (4) **GOOD MALTING QUALITY.**

It is **NEW** and it is the **Best Yielding Malting Barley.** Limited Supply. Order **NOW**.

\$2.00 per bu., including bags

PROF. HANSEN'S PROSO GRAIN AND HAY MILLET

We'd like to see you try Prof. Hansen's Proso Grain Millet in your ration. This high protein feed is necessary for heavy production. It will keep your chickens healthy and will produce many more eggs. The Latin name (*Panicum Mitiaceum*) indicates that it will yield a thousand fold.

A field of Proso that yielded 75 bushels of grain per acre

A Grain Crop in Sixty Days

This Russian introduction yields fifty to eighty bushels per acre. It takes only sixty or seventy days to mature a grain crop. This is one of the most versatile crops in the country and can be grown everywhere, on dry land and on irrigated land, low land or upland. It can be cut for hay or matured for grain which makes a wonderful chicken feed and can also profitably be used for fattening turkeys and livestock. We counted 1,500 kernels on one plant of Proso.

On dry land plant twenty pounds per acre, any time from May 1st to August 1st. In sections with better rainfall plant it at the rate of 30 pounds per acre with a grain drill. Harvest the same as you do grain.

Look for Two Eggs from Every Pound of Feed.

10 lbs. \$1.00; 25 lbs. \$1.75; 50 lbs. \$3.00; 100 lbs. \$5.75; 500 lbs. \$27.50

Mighty High in Goodness—Mighty Low in Price

HAY MILLETS

KURSK SIBERIAN—A very fine variety of millet, extremely hardy and withstands drought. The plant shows a remarkable stooling habit, as many as 30 to 40 stalks frequently grown from one seed. Produces the most hay from least amount of rainfall.

Prices: 50 lbs. \$3.50; 100 lbs. \$6.25; 300 lbs. \$18.50

WHITE WONDER AND GERMAN MILLET

A wonderful producer of hay and exceedingly valuable as a food for cattle and sheep. Like other millets it has a very low water requirement and is an excellent dry land crop. Produces 4 or 5 tons of hay per acre.

Prices: 50 lbs. \$3.50; 100 lbs. \$6.25; 300 lbs. \$18.50

Improved TEPARY BEAN

A small white edible bean that yields 50 per cent more beans per acre than other types. Can also be used for a quick high protein hay crop and soil builder. Plant it first week in June and in 60 days you have large tonnage high protein hay and pasture.

It has greater HEAT and DROUGHT RESISTANCE than other beans, producing good crops in seasons when other beans failed completely, and has outyielded the best varieties of soybeans by a considerable margin.

10 lbs. \$2.25; 25 lbs. \$5.10; 50 lbs. \$9.50; 100 lbs. \$18.00

TENDERGOLD—Ripens in 79 days—sweet—tender—succulent.

Imp. Golden Bantam

A REAL CASH CROP

Here is a harvest picture of Sweet Spanish Onions taken by the Black Hills Studio, in Spearfish Valley, of a field that made 1,600 bushel baskets per acre. Who can top this? We have similar reports from customers in Michigan, Nevada and Colorado. Mr. James Muroya of Kersey, Colorado, who specializes with our Utah strain Sweet Spanish Onions came near making same record of production.

The Utah Strain of SWEET SPANISH Onion seed produces the best onions for home use and the most profitable crops for market.

ORDER BLANK

For the enclosed \$....., please send
the following order:

Your Money's Worth or Your Money Back—It is mutually agreed and understood that any seeds ordered of us may be returned at any time within ten days after receipt, if not satisfactory, and money for them will be refunded, but we do not and cannot in any way warrant the stand or the crop as they depend on so many conditions beyond our control.

[illegible]

Field seeds are subject to market price changes after February 1st

Field of Cossack Alfalfa

IT WORKS WHILE OTHERS SLEEP

Cossack shows the greatest vigor of spring growth of all varieties. It also has a quicker start of new growth after a cutting for a second and third crop while other strains lie dormant awhile.

CROP INSURANCE

Judge wisely, it is better to be safe than sorry. While Cossack alfalfa seed costs slightly more per pound, a little less seed is required per acre to produce a full stand, because of its larger, bushier and leafier plants.

NO FOUL WEEDS

You not only get the hardiest and best yielding ability in our Cossack alfalfa, but you are also safe from noxious weeds such as Quack Grass, Canada Thistle and other troublesome pests. Our seed is free from all foul weeds and complies with your state laws as well as with the Federal Seed Act.

SURVIVAL VALUE

In Cossack alfalfa you have a double value crop. It not only yields the most alfalfa hay per acre but it withstands the worst below zero freezing as well as the hottest and driest summers and it stands pasturing without material injury.

\$35.40 per bushel; \$58.50 per 100 lbs., including bags and inoculation

LADAK AND COSSACK ALFALFA MIXED

For sections of country where wilt disease bothers alfalfa we recommend this mixture composed of half Ladak and half Cossack alfalfa for resistance to disease and at the same time high yielding ability of hardy alfalfa. 99 per cent purity, 90 per cent or more live seed. Fancy quality.

\$37.20 per bushel; \$61.50 per 100 lbs., including bags and inoculation

FROM AN ALFALFA CUSTOMER

Dear Mr. Bober:

I am glad to state that the alfalfa seed we obtained from you has made the finest growth of alfalfa that I have ever seen. I have been growing this crop for a good many years, but I am frank to say that we have never obtained the results with any alfalfa equivalent to that obtained from your seed. This is the reason we are using the seed again this year on an increasing number of properties, including one farm in Mississippi.

Very truly yours,

D. Howard Doane.

Ed Morgan, Fallon, Nev., in a newly planted field of Ladak and Cossack alfalfa, which is real productive and disease resistant.

BOBER'S 30-DAY RICHGREEN LAWN GRASS

**For a Beautiful Lawn
All Season**

Order Bober's "30-Day Lawn Grass" early and sow it as soon as the snow melts away in early spring. Sow one pound to 250 square feet and you will have a well established lawn by early summer. This mixture consists of fine leaved and deep rooted perennial grass and some White Dutch Clover, which assures a beautiful rich green lawn thick and free from weeds.

Unsurpassed for open sunny spaces. Adapted to areas of moderate shade.

1 lb. 80c; 3 lbs. \$2.25; 5 lbs. \$3.60; 10 lbs. \$7.00 postpaid.

Richgreen Lawn Grass

WHITE DUTCH LAWN CLOVER Seed.

1 lb. \$1.00; 5 lbs. \$4.60

KENTUCKY BLUEGRASS Seed.

1 lb. \$1.15; 5 lbs. \$5.50; 10 lbs. \$10.50 postpaid

BUFFALO GRASS

Makes Wonderful Lawns in Dry Climate Regions

In the lighter sandier soils, and the dry and semi-dry regions Buffalo Grass has proven highly desirable for lawn use. It is a low growing plant, seldom getting over 6 inches in height; hence needs no cutting and requires very little care. Our seed is treated and scarified to make it grow quicker. Since it is spread from underground root stocks, as well as from seed, once you get a thin stand established, it thickens up all by itself.

1/4 lb. 65c; 1/2 lb. \$1.20

One pound covers 3,000 square feet. \$2.00, Postpaid

FAIRWAY STRAIN OF CANADIAN CRESTED WHEATGRASS

A very hardy, leafy grass easy to start if planted real early in the spring because it germinates better in cool, moist weather. Plant at the rate of one pound to 300 square feet. Very good for dry regions.

1 lb. 40c; 5 lbs. \$1.75, Postpaid

LEGUME AID INOCULATION FOR ALFALFA AND CLOVER SEED for better stands, better yields and better feeding value.

1 bu. size carton 50c; 2 1/2 bu. size carton \$1.00 prepaid
